

## WORLD COMMUNITY

Twelfth: We deplore the division of humankind on nationalistic grounds. We have reached a turning point in human history where the best option is to transcend the limits of national sovereignty and to move toward the building of a world community in which all sectors of the human family can participate. Thus we look to the development of a system of world law and a world order based upon transnational federal government. This would appreciate cultural pluralism and diversity. It would not exclude pride in national origins and accomplishments nor the handling of regional problems on a regional basis. Human progress, however, can no longer be achieved by focusing on one section of the world, Western or Eastern, developed or underdeveloped. For the first time in human history, no part of humankind can be isolated from any other. Each person's future is in some way linked to all. We thus reaffirm a commitment to the building of world community, at the same time recognizing that this commits us to some hard choices.

Thirteenth: This world community must renounce the resort to violence and force as a method of solving international disputes. We believe in the peaceful adjudication of differences by international courts and by the development of the arts of negotiation and compromise. War is obsolete. So is the use of nuclear, biological, and chemical weapons. It is a planetary imperative to reduce the level of military expenditures and turn these savings to peaceful and people-oriented uses.

Fourteenth: The world community must engage in cooperative planning concerning the use of rapidly depleting resources. The planet earth must be considered a single ecosystem. Ecological damage, resource depletion, and excessive population growth must be checked by international concord. The cultivation and conservation of nature is a moral value; we should perceive ourselves as integral to the sources of our being in nature. We must free our world from needless pollution and waste, responsibly guarding and creating wealth, both natural and human. Exploitation of natural resources, uncurbed by social conscience, must end.

Fifteenth: The problems of economic growth and development can no longer be resolved by one nation alone; they are worldwide in scope. It is the moral obligation of the developed nations to provide--through an international authority that safeguards human rights--massive technical, agricultural, medical, and economic assistance, including birth control techniques, to the developing portions of the globe. World poverty must cease. Hence extreme disproportions in wealth, income, and economic growth should be reduced on a worldwide basis.

Sixteenth: Technology is a vital key to human progress and development. We deplore any neo-romantic efforts to condemn indiscriminately all technology and science or to counsel retreat from its further extension and use for the good of humankind. We would resist any moves to censor basic scientific research on moral, political, or social grounds. Technology must, however, be carefully judged by the consequences of its use; harmful and destructive changes should be avoided. We are particularly disturbed when technology and bureaucracy control, manipulate, or modify human beings without their consent. Technological feasibility does not imply social or cultural desirability.

Seventeenth: We must expand communication and transportation across frontiers. Travel restrictions must cease. The world must be open to diverse political, ideological, and moral viewpoints and evolve a worldwide system of television and radio for information and education. We thus call for full international cooperation in culture, science, the arts, and technology across ideological borders. We must learn to live openly together or we shall perish together.
